**Report of Non-sponsored Activities**

**Brief Details about the Programme:**

The UI/UX Development workshop, organized by the IEI Computer Science Students Chapter, was conducted on the 12th and 13th of October at 2:30 pm in the Database Lab. This event aimed to provide participants with a foundational understanding of HTML coding.

The workshop was an engaging two-day session that delved into the basics of HTML through hands-on activities. Participants, consisting of 32 students from various branches, actively engaged in web development exercises and practice projects. This interactive approach helped them grasp the fundamentals of HTML effectively.

One of the key highlights of the workshop was the hands-on web development, allowing participants to apply what they learned immediately. Practice projects were conducted to reinforce their newly acquired knowledge and skills. This practical aspect enhanced the learning experience and left participants with a strong grasp of HTML basics.

Special thanks goes to Miss Fathima B of S5 CSE, who took the lead in conducting the workshop and making it a success. Her dedication and expertise in the subject matter greatly contributed to the workshop's positive outcomes.

In conclusion, the UI/UX Development workshop proved to be an insightful and interactive learning experience for the 32 enthusiastic participants. It set the stage for further exploration of web development and design, laying a strong foundation for future sessions in this series.
